Profile

I began my career as a software developer three years ago when I enrolled in college to study computer programming. Since graduating, I have enrolled in digitalCrafts an immersive coding bootcamp. I am passionate about technology and currently looking for opportunities in Atlanta. I have learned the following technologies in the past 3 years: Java, MySQL, Firebase, HTML, CSS, Bootstrap, JavaScript, PostgreSQL, Python, Node, Express, jQuery, React native, React and Redux.

Experience

Mobile App Hero

September 2017

Mobile app developer (internship)

WeWork Tower Place, Atlanta

design and develop apps using Javascript frameworks, react and react native, node.

Web Development Projects (Bootcamp)

Feb - June 2017

vinylauction.com: built using react, redux,

node.js, express, stripe API, PostgreSQL

Smarta: built using node.js, express, handlebars,

Google and Yelp APIs, PostgreSQL
